

Statement of Substance of Interview

[0003] The Examiner graciously talked with the undersigned representatives for the Applicant—on December 19, 2008. Applicant greatly appreciates the Examiner's willingness to talk. Such willingness is invaluable to each of us in our common goal of an expedited prosecution of this patent application.

[0004] During the interview, we discussed the amendments to claim 25 to provide consistency of description for the video frame elements.

[0005] During the interview, we also discussed how the amended claims would overcome the 35 U.S.C. §101 rejections. Without conceding the propriety of the rejections and in the interest of expediting prosecution, we also proposed several possible clarifying amendments.

[0006] We understood the Examiner to tentatively concur with the proposed amendment to independent claim 33 and the continued allowability of independent claim 20. However, the Examiner indicated that he would need to complete an updated search upon receiving the formal response

[0007] Applicant herein amends the claims in the manner discussed during the interview. Accordingly, Applicant submits that the pending claims are allowable over the cited art of record for at least the reasons discussed during the interview.
